# rad.io

mockup design

by Victor Schneuwly

Identity:

For the logo and the colors, the main inspiration comes from the recording studio. Indeed the red is the color we picture for recording. The orange was an easy choice as it is a color that works well with it.
The logo is a simplified microphone with the headset that reminds us of both the singing and listening aspects of the game.

Light mode:

For the ui, the idea of the sound wave was used as an inspiration. It gives the app a smooth looking interface.
